<b>IP Telephony</b>		
WAP150-K9	 <p>Cisco WAP150 Wireless-AC/N Dual Radio AccessPoint <b>With PoE &amp; Adaptor</b>                      2.4 Antenna Gain: 3.61 dBi , 5.8 Antenna Gain: 3.85 dBi                      MIMO: 2*2 in 2.4 &amp; 2*2 in 5.8                      Number of access point per cluster: 4                      Multiple SSID: 8 &amp; VLAN: 8                      Active User per radio: 10                      data rate: 1.2 Gbps                      Captive Portal function &amp; Fast Roaming                      RADIUS Support                      ethernet ports: 1 * 10/100/1000</p>	13,300,000
WAP361-E-K9	 <p>Wireless-AC/N Dual Radio Wall Plate Access Point <b>With PoE</b>                      2.4 Antenna Gain: 4.35 dBi , 5.8 Antenna Gain: 3.96 dBi                      MIMO: 2*2 in 2.4 &amp; 2*2 in 5.8                      Number of access point per cluster: 8                      Multiple SSID &amp; VLAN: 16                      Active User per radio: 32                      data rate: 1.2 Gbps                      Captive Portal function                      RADIUS Support                      ethernet ports: 5 * 10/100/1000</p>	14,500,000
WAP371-E-K9	 <p>Cisco WAP371-EK9 Dual Radio 802.11ac Access Point <b>With PoE</b>                      2.4 Antenna Gain: 2dBi , 5.8 Antenna Gain: 2dBi                      MIMO: 2*2 in 2.4 &amp; 3*3 in 5.8                      Number of access point per cluster: 8                      Multiple SSID &amp; VLAN: 16                      Active User per radio: 30                      data rate: 1.3 Gbps                      Captive Portal function &amp; Fast Roaming                      RADIUS Support                      ethernet ports: 1 * 10/100/1000</p>	14,500,000
WAP571-E-K9	 <p>Wireless-AC/N Premium Dual Radio Access Point <b>With PoE</b>                      2.4 Antenna Gain: 2.4 dBi , 5.8 Antenna Gain: 1.99 dBi                      MIMO: 3*3 in 2.4 &amp; 3*3 in 5.8                      Number of access point per cluster: 16                      Multiple SSID: 16 &amp; VLAN: 32                      Active User per radio: 50                      data rate: 1.9 Gbps                      Captive Portal function &amp; Fast Roaming                      RADIUS Support                      ethernet ports: 2 * 10/100/1000</p>	17,500,000
WAP571E-E-K9	 <p>Wireless-AC/N Dual Radio Outdoor Wireless Access Point <b>With PoE</b>                      2.4 Antenna Gain: 2.98 dBi , 5.8 Antenna Gain: 3.55 dBi                      MIMO: 3*3 in 2.4 &amp; 3*3 in 5.8                      Number of access point per cluster: 16                      Multiple SSID: 16 &amp; VLAN: 32                      Active User per radio: 50                      data rate: 1.9 Gbps                      Captive Portal function &amp; Fast Roaming                      RADIUS Support                      ethernet ports: 2 * 10/100/1000</p>	24,000,000
